

JENISH JEYADHAS

Cloud & DevOps-Oriented Full Stack Software Engineer

Location: Kanyakumari, India • Open to Relocation / Remote

Email: jenishjeyadhas.7@gmail.com

Phone: +91 8610800892

Profiles: LinkedIn • GitHub

TECHNICAL COMPETENCIES

Cloud, CI/CD & DevOps

- Kubernetes
- Tekton Pipelines
- IBM Cloud Toolchain
- AWS
- GitOps
- DevSecOps & CC
- Container Registry
- Docker

Backend Architecture

- Java (8+)
- Spring Boot
- Golang
- Python
- Hibernate (JPA)
- RESTful APIs
- Microservices

Frontend & Web

- React.js
- JavaScript (ES6+)
- HTML5 / CSS3
- State Management

Tools & Engineering

- Git / GitHub
- Maven / Gradle
- JUnit / Postman
- IntelliJ / VS Code
- Agile / Scrum

EDUCATION

Bachelor of Engineering (B.E.)

Computer Science • Anna University
Chennai, India • Graduated July 2022

Diploma in Computer Science

Morningstar Polytechnic College
Nagercoil, India • June 2019

CERTIFICATIONS

AWS Certified Cloud Practitioner

Amazon Web Services (AWS)

Certified Blockchain Developer

Infosys Certified

Java Spring & React Developer

Infosys Foundation Program

LANGUAGES (CEFR)

- English

Proficient / Working (C1)
- Tamil

Native Speaker
- Malayalam

Professional Working
- Hindi

Working Proficiency (B1/
B2)
- German (Deutsch)

Basic / Elementary (A1)

PROFESSIONAL SUMMARY

Cloud- and DevOps-oriented Full Stack Software Engineer with 4+ years of industry experience across enterprise application architecture, microservices engineering, and cloud-native release automation. Proven expertise in building automated CI/CC/CD pipelines using Tekton and IBM Cloud Toolchains, embedding DevSecOps and GitOps methodologies to ensure high-velocity, compliant software delivery. Skilled in Java, Spring Boot, React.js, and container orchestration with Kubernetes aligned with European engineering standards.

PROFESSIONAL EXPERIENCE

Application Developer • Cloud & DevOps

09/2025 – Present

IBM India • Kochi, Kerala, India

- Architected and implemented end-to-end CI, Continuous Compliance (CC), and CD pipelines using **IBM Cloud Toolchains** and **Tekton (One Pipeline)**.
- Embedded automated security scans, quality gates, and compliance policy checks into delivery pipelines, driving rigorous **DevSecOps** standards.
- Configured Continuous Deployment pipelines to automate containerized workload rollouts onto managed **Kubernetes** clusters in IBM Cloud.
- Adopted **GitOps** operational models to guarantee declarative, auditable, and version-controlled production application states.
- Governed container image lifecycles by integrating IBM Cloud Container Registry with vulnerability scanning and immutable image tagging.
- Monitored build telemetry and pipeline execution logs to diagnose and remediate deployment failures, optimizing mean time to repair (MTTR).

Senior Systems Engineer • Full Stack Developer

04/2022 – 08/2025

Infosys Limited • Trivandrum, Kerala, India

- Engineered high-performance, scalable microservices in **Java (8+)** using **Spring Boot** and **Hibernate (JPA)** for enterprise clients.
- Designed and integrated contract-driven **RESTful APIs**, applying strict versioning strategies, payload optimization, and validation controls.
- Developed reactive, modular user interfaces utilizing **React.js**, JavaScript (ES6+), HTML5, and CSS3 to deliver seamless full-stack capabilities.
- Authored lightweight CLI tools and background utilities in **Golang** to streamline repetitive operational tasks and processing efficiency.
- Guaranteed code reliability by instituting unit test suites with JUnit and verifying API endpoints with Postman collections.
- Eliminated systemic backend performance bottlenecks through proactive thread profiling, memory inspection, and structured logging.
- Participated in Agile Scrum ceremonies, pull-request peer reviews, and sprint planning.
